

Lab 4: Virus Scanner

Name:

Date:

Course:

Team Number:

Section 1 - Using Program as Intended

1. Describe what commands you see after typing 'help'. What do they do?
2. What is the output from greet, using your name?
3. Does add and subtract include negative integers?

Section 2 - Inputting Wrong Input

4. What happens if you input a command that's not in the list?
5. What happens if you don't input an integer in add or subtract?
6. Try to input random numbers for greet. Does it work?

Section 3 - Malicious code

7. Try inputting 'rm file' as a command. What happens?
8. Try inputting 'rm file' after inputting greet. What happens?
9. How is this secure? What does 'rm' do normally?

10. What happens in a normal virus scanner if it finds malicious files?

11. How is this lab related to a virus scanner?

Section 4 - Evidence (Screenshots)

- Students must include:
- Screenshot of commands after typing help
- Screenshot of add, greet, and subtract after doing intended process
- Screenshot of exploit failing
